

The FASEB SRC **Glucose Transport: Gateway For Metabolic Systems Biology** is providing a three part career development workshop that covers topics most graduate and post-doctoral programs do not have time to cover. The first session will tell us how to develop an impactful curriculum vitae - "What Professional Activities *Don't* Really Matter?" and will be lead by Dr. Jeffrey Pessin, Judy R. and Alfred A. Rosenberg Professorial Chair in Diabetes Research Director, Diabetes Research Center, Albert Einstein College of Medicine. The second session giving us the tools that we need to balance career and family – "You *Can* Have it All" will be co-lead by Dr. Silvia Corvera, Professor of Molecular Medicine and Dr. Michael Czech, Professor and Chair, Molecular Medicine, University of Massachusetts Medical School. The final session will engaging us in decision-making processes for career pathways – "What Path is Right for You?" and will be lead by Dr. Anthony Carruthers, Professor of Biochemistry and Molecular Pharmacology and Graduate College Dean, University of Massachusetts Medical School.
